### Item specifics

Country of Manufacture: Germany

Here is a very cool, vintage German-made, Rio electric guitar with its original case. This guitar is in excellent condition. I'd say it spent most, if not all, of its life under the bed. The body is constructed of molded plastic and is in nearly flawless condition. The only minor spot is around the strap peg on the upper bout (see photo) All electronics work and the guitar plays very nicely. Pickups are covered in some sort of faux marble. Tuners are original and turn freely. Minimal fret wear. Tremolo is complete and even includes the bridge cover. The case is in excellent condition as well, but has a small break at one of the clasps (see photo). The headstock logo is clear and unblemished. The pickguard is missing a couple of screws and the cap is missing from the volume knob. Other than that, it appears to be totally complete and original.

This is the first one of these I have seen. It is a very well made instrument with high-quality machining and components. It produces a very unique meaty tone.

I am fine to ship overseas. Shipping will have to be determined for your location. Continental U.S. shipping will be \$40.00.

I'll be glad to answer any questions.

Thank you,

BP
